Contents

Introduction to Special Issue vii

Flow past two-dimensional membrane aerofoils with rear separation
S. Cyr, B.G. Newman 1
Modelling the aerodynamics of upwind sails
P.S. Jackson 17
A new vortex lattice method for calculating the flow past yacht sails
S.P. Fiddes, J.H. Gaydon 35
A theory for inextensible and high aspect-ratio sails
T. Sugimoto 61
Application of a non-convex model of fabric deformations to sail cut analysis
O. Le Maître, S. Huberson, J.E. Souza de Cursi 77
Computer modelling of downwind sails
K.L. Hedges, P.J. Richards, G.D. Mallinson 95
Numerical simulation of the flow over sails in real sailing conditions
T. Charvet, F. Hauville, S. Huberson 111
Sail optimisation for maximal speed
A.H. Day 131
Model tests of twisted flow wind tunnel designs for testing yacht sails
R.G.J. Flay, N.J. Locke, G.D. Mallinson 155
A twisted flow wind tunnel for testing yacht sails
R.G.J. Flay 171
America's Cup sail design
J.B. Fallow 183
